MEMORANDUM FOR: Deputy Assistant Director, National Estimates

Subject: N.E.S.C. Intelligence Requirements,
Ad Hoc Working Group, Soviet Air Defenses
In Mid-1962

8-1284

References: a. Memorandum 30 June 1958
b. Memorandum 11 July 1958T. S. Cont. No.
AFCIN, HQ USAF

In accordance with reference b, above, an Ad Hoc Working Group on Soviet Air Defenses in Mid-1962, chaired by the Joint Staff, with members and advisors invited from all agencies and JTIB, GMIC, JAEIC and SEC, reviewed appropriate portions of NIE 11-57, "Sino-Soviet Bloc Air Defense Capabilities Through Mid-1962" (16 July 1957) from 10 July 1958 to date, for the purpose of providing the IAC with intelligence assumptions for the Net Evaluation Sub-Committee.

The Ad Hoc Working Group, after re-examination of NIE 11-57, believes that most of the NESC Soviet Air Defense requirements are presently covered by NIE 11-57, and that this coverage continues to be valid, with exception of the additions, updatings and modifications that follow. The Ad Hoc Working Group recommends that paragraphs 24, 25, 33, 34, 38, 40, 47 and 57 be revised where necessary to conform with the S.E.C. contribution to N.I.E. 11-4-58, when approved.

<u>Page</u>	<u>Paragraph</u>	
-------------	------------------	--

2	2	Third Sentence: Delete "1300" and substitute "1600". Last Sentence: Delete "35,000" and substitute "up to 40,000 to 45,000 feet". Add at end of Paragraph: "By mid-1962 we estimate that the Sino-Soviet Bloc fighter strength will be about 15,000 with approximately 40% of that number all-weather types."
2	5	Third Line: Delete word "low".

TOP SECRET

~~TOP SECRET~~TOP SECRET

<u>Page</u>	<u>Paragraph</u>	
3	11	Third Sentence: Delete and substitute: "We estimate that the USSR will probably not increase its present numerical fighter strength and a cutback in the number of Soviet manned interceptors will probably begin prior to mid-1962."
3	12	Delete last clause and substitute: "By 1960 the Soviets will probably have in full operation a digital data handling system for aircraft reporting and control purposes."
6	24	Revise to conform with N.I.E. 11-4-58, when approved.
6	25	Add: "There is some evidence that Soviets may be introducing a new IFF system which will probably be fully operational by 1960."
7	29-31	<u>NOTE</u> : Should be revised to conform with NIE 11-5-58 when approved.
8	33	Revise to conform with N.I.E. 11-4-58, when approved.
8	34	Revise to conform with N.I.E. 11-4-58, when approved.
9	38	Change next to Last Sentence to read: "The USSR has been engaged in the development of automatic data handling devices suitable for air defense purposes." Delete the last sentence and substitute: "It is believed that the Soviets are introducing such equipment into operational use and that many key areas have this equipment at the present time."

~~TOP SECRET~~

~~TOP SECRET~~TOP SECRET

<u>Page</u>	<u>Paragraph</u>	
9	40	Second Sentence: Delete all after ". . . microwave frequencies." Substitute for deleted clause the following sentence: "Both shipborne and ground-based X-Band jamming equipment are in operational use." Fourth Sentence: Delete sentence beginning "The vulnerability . . ." and substitute the following: "A trend has been noted towards frequency diversification, reducing the earlier concentration of frequencies in the 75-85 mc/s, 2610-3100 mc/s, and 9200-9500 mc/s bands. This trend includes the addition of L-Band frequencies near 500 mc/s and probably the use of rapidly changeable frequencies in some radars."
10	43	Add, "By mid-1962 there will be about 285 regiments of fighters in Soviet Air Forces. Add, "The European Satellites and Communist China are expected to receive increasing quantities of AAA guns of the 100 and 57 mm types. In addition, newer type radar for warning and control purposes will be allotted in these countries."
11	47	First Sentence: Delete "500" and substitute "600". Add, "We estimate that the entire periphery of the USSR now has early warning radar. The long standing gaps in peripheral early warning radar coverage along the Arctic coast between Dikson and the Chukotski is now believed to have been filled, though perhaps not as extensively as in other areas. The Soviets by mid-1962 will probably have radar cover for all areas, except for inland areas of central and eastern Siberia."

(Cont'd) 67
(Cont'd)

air raid drills are prescribed. There is some evidence that drills have been conducted on a city wide basis. By mid-1962 we estimate that this type of defense will be expanded to most major cities and target areas.

15-16 70-75 incl
76 (1st
sentence)

NOTE: Discussion of Western developments appears in these sections. It is estimated that the Soviets will assess Western developments accurately for just what they will be. The NESC, presumably, will be informed fully of the Western air and missile threat to the Bloc.

16-17 76

Change Fourth Sentence as follows:
". . . into operational units as follows:
in late 1958, a FISHBED-FACEPLATE type;
in late 1958 the FITTER day fighter, and
in . . . "

17 77

Change Second Sentence: "Maximum speeds of about 1200 knots will probably be achieved by the 1958-1959 day fighter." In the Fourth Sentence, change the first word "Most" to "All".

17 78

Delete from Last Sentence "60 percent" and substitute "50 percent".

17 79

Delete Last Sentence, add: "On this basis; we hold estimated Soviet fighter strength constant at about 10,000 through mid-1960 at which time the Soviets will probably gradually decrease their fighter strength. By mid-1962 we estimate the Soviet fighter strength to be slightly over 9,000 aircraft."

TOP SECRET

TOP SECRETPage Paragraph

19 89 Change Fifth Sentence and all Sentences thereafter, as follows: "Considering operational availability dates as falling within a two-year period, in some cases, (Refer N.I.E. 11-5-58), and air defense missiles as a high-priority element in an over-all Soviet missile program, we believe that the USSR might produce, by mid-1962, sufficient missiles and guidance equipment to accomplish an operational program of a general order of magnitude about as follows:

<u>Estimated Missile</u> <u>Types</u>	<u>No. of Missile</u> <u>Units</u>
SA-1	56
SA-2	175
SA-3	150
SA-4	100
Total	481

In addition, they could equip about 6 cruisers and 16 destroyers with surface-to-air missiles; and equip all Bloc all-weather fighters and some Bloc day fighters with air-to-air missiles or unguided rockets of various types."

21 96 Delete Second Sentence and substitute:
"We also have evidence that in addition to the Soviet employment of individual cruisers and destroyers in air early warning exercises, Soviet minesweepers are now being adapted for use as station radar picket ships for continental early warning."

TOP SECRET

~~TOP SECRET~~TOP SECRETPage Paragraph

21 98 Delete last three Sentences and substitute:
 "The limitation imposed by current air-
 ground radio communications equipment
 is probably being overcome by use of an
 air-ground data-link system. By mid-1962
 it is estimated that this equipment will
 be in widespread use."
 22 100 Delete Third and Fourth Sentences and
 substitute following: "By mid-1960,
 the air defense control and reporting
 system will be passing information in
 digital form and computers will be
 employed to increase the traffic
 handling capacity and to solve the
 complex problems associated with
 ground-controlled intercepts. This
 system will be in widespread use within
 the USSR and probably in the European
 Satellite countries."
